

## Queens County – Caledonia FIBE expansion

- Orange lines represent a pole line with primary power service; these poles are the poles that we will build our FIBE network on
- Essentially, if a customer has power within the blue boundary line, they will get FIBE service
- The green boundary line represents the CTI fibre backbone job that we built with FIBE flexnap cable; any customers along the main road to the County line, will get FIBE service as well
- Refer to associated civic address reference document entitled "Caledonia FIBE build – civic address boundaries.pdf"
